

# TELECOM MARKET

## VIDEOCONFERENCE AND VoIP

### SERVICE DESCRIPTION

With the goal of covering the individual needs of each client, HISPASAT makes a VoIP service available to ISP's. HISPASAT configures the final-user terminals over HISPASAT's IP platforms to assure voice/videoconference service priority (real time service) over data. The solution offered includes a VoIP supplier and authorized equipment (VoIP telephones).

### TARGET USERS

- ISP's.
- Fixed/mobile telephony operators.
- Communications infrastructure operators.
- Companies, institutions, radio broadcasters, e-service users (e-learning, e-health, e-government).

### TECHNICAL SOLUTION
